Indian · Student residence permit (§16b AufenthG): 20 h/week in semester

profile

Junior DevOps & Cloud Engineer with 10 months of production experience: built GitHub Actions pipelines for 3 products, ran AWS (EC2, S3, IAM, VPC) across Dev, Stage and Production, and resolved 50+ incidents. M.Sc. Computer Science student at RPTU Kaiserslautern, building a Kubernetes lab. 20 h/week in semester, up to 40 in breaks; available immediately; willing to relocate within Germany.

skills

`cloud`	AWS (EC2, S3, IAM, VPC, CloudWatch), Firebase
`ci_cd & iac`	GitHub Actions, Terraform (basics), Git
`containers`	Docker · learning: Kubernetes (kind), Helm
`linux & scripting`	Linux administration, Bash, Python, cron
`monitoring`	AWS CloudWatch alarms · learning: Prometheus, Grafana
`network & security`	VPC segmentation, least-privilege IAM, subnetting, routing (CCNA ITN course)
`code & data`	Python, JavaScript, Flutter (Dart), SQL (PostgreSQL, MySQL), Firestore
`ai tools`	Claude Code, MCP connectors
`languages`	English C1 · German A1 (Goethe certificate), actively learning · Hindi, Gujarati native

education

M.Sc. Computer Science · RPTU Kaiserslautern, Germany `10/2023 – 09/2027 (expected)`

Focus: Distributed Systems, Network Security · Courses: Network Security; Internet Security Assessment and Operations · Seminar paper: "The Gap Between Theory and Reality: A Survey of Deniable Messaging"

B.Tech Computer Science & Engineering · Ganpat University, India `08/2017 – 05/2021`

Specialization: Cloud-Based Applications · CGPA 8.67 / 10 (top 10% of class) · Placement Coordinator 2021

experience

Career break · Master's preparation and relocation to Germany `04/2022 – 09/2023`

Junior DevOps Engineer · Maven Infosoft Pvt. Ltd., Ahmedabad, India `06/2021 – 03/2022`

IT services company (~10 staff) building web products for clients. CI/CD for 3 products; AWS for a .NET school-management CMS used by 3–4 schools (7 EC2 servers across Dev, Stage and Production).

- Resolved 50+ production incidents in my first six months as first contact for infrastructure alerts, tracing them through logs and fixing the networking faults behind most of them.
- Automated testing, UAT and dev deployments for 3 products by building their GitHub Actions pipelines.
- Secured Dev, Stage and Production on AWS (EC2, S3, VPC) for the CMS and its 7-person team by writing least-privilege IAM policies and segmenting the VPC.
- Caught 8–10 CPU and memory problems before customers noticed with AWS CloudWatch alarms and Python uptime checks run as cron jobs on Linux.
- Cut new-developer onboarding time by 30% and maintenance time by 20% by writing the deployment runbooks from scratch and rewriting the update SOPs.
- Led monthly post-mortems with developers, each reviewing 4–6 incidents to find their root causes.
- Trained 7 teammates in Docker as the team began moving its deployment pipeline to containers.

Junior Developer Intern · Apexa Information System, Ahmedabad, India `01/2020 – 06/2020`

Internship on a task-management app for about 4 users, built end to end.

- Built and shipped a cross-platform Flutter task manager with a real-time Firebase backend; designed its data model and deployed it on Firebase Hosting.

projects

Kubernetes Lab · kind, Helm, Prometheus, Grafana 10/2026 – present
github.com/Jaival/kubernetes-learning-lab
Multi-node kind cluster running locally; Helm charts and Prometheus/Grafana monitoring are the next modules, building toward a capstone app deployed by CI.

NextGleis · Expo, React Native, TypeScript, Node.js on Vercel 08/2026 – 10/2026
github.com/Jaival/NextGleis
Serverless proxy on Vercel turns transport-API XML into JSON and keeps the API keys off the device; CI runs type checks, tests and npm audit, and Android builds on EAS publish the APK to GitHub Releases.

Job-Hunt Agent · Claude Code, MCP (Gmail, Indeed), Python 09/2026 – present
github.com/Jaival/jobhunt-agent
Scheduled agent that pulls job ads from APIs and Gmail alerts, scores them and drafts applications for human review; Python tools keep a job ledger and block drafts with placeholders. Nothing is sent automatically.

Further projects (web, desktop and mobile apps with CI): Invoicely, NextToBinge, mdgloss, Taskly · github.com/Jaival

certifications

- AWS Academy Cloud Foundations
- Google Cloud Platform Fundamentals
- AWS Cloud Quest: Generative AI Practitioner
- Cisco CCNA: Introduction to Networks (course)
