# Jaival Saija

**Working Student (Werkstudent) – DevOps / Cloud Engineering**

Am Harzhübel 38, 67663 Kaiserslautern, Germany · +49 174 512 6677 · saijajaival@gmail.com
jaivalsaija.dev · github.com/Jaival · linkedin.com/in/jaivalsaija
Work permit: student residence permit (§16b AufenthG) – 20 h/week in semester, up to 40 h/week in breaks · Available immediately · Willing to relocate within Germany

## Profile

M.Sc. Computer Science student at RPTU Kaiserslautern (Distributed Systems, Network Security; graduating 09/2027) with 10 months as a Junior DevOps Engineer (06/2021 – 03/2022): built GitHub Actions deploy pipelines to AWS for 2 products, ran AWS (EC2, S3, IAM, VPC) for a 7-server Dev/Stage/Production setup, and resolved 50+ production incidents. Team project on software-defined radio (Python, GNU Radio, Git) in winter semester 2025/26; since 08/2026 building projects with GitHub Actions CI, now a Kubernetes lab on kind.

## Skills

| | |
|---|---|
| cloud | AWS (EC2, S3, IAM, VPC, CloudWatch), Firebase |
| ci_cd & iac | GitHub Actions, Git, GitLab, Terraform (basics) |
| containers | Docker |
| linux & scripting | Linux administration, Bash, Python, cron |
| monitoring | AWS CloudWatch alarms |
| network & security | VPC segmentation, least-privilege IAM, subnetting, routing |
| code & data | Python, JavaScript, TypeScript, Node.js, SQL (PostgreSQL, MySQL) |
| kubernetes (beginner) | kind, kubectl · Currently learning: Helm, Prometheus, Grafana |
| languages | English (C1) · German (A1, Goethe certificate 03/2023, learning A2) · Hindi, Gujarati (native) |

## Experience

**Career break** · Master's preparation and relocation to Germany — 04/2022 – 09/2023

- Took the GRE for M.Sc. admission.
- Passed the Goethe-Institut German A1 exam (03/2023).

**Junior DevOps Engineer** · Maven Infosoft Pvt. Ltd., Ahmedabad, India — 06/2021 – 03/2022

*IT services company (~10 staff) building web products for clients. Deploy pipelines for 2 products; AWS for a .NET school-management CMS used by 3–4 schools (7 EC2 servers across Dev, Stage and Production).*

- Resolved 50+ production incidents in the first six months as first contact for infrastructure alerts, most within 1 hour; traced them through logs and fixed the networking faults behind most of them.
- Built GitHub Actions pipelines to deploy 2 of the 3 products to AWS; they reached the testing stage but were not used in production because of .NET version limits.
- Secured Dev, Stage and Production on AWS (EC2, S3, VPC) for the CMS and its 7-person team: wrote least-privilege IAM policies and segmented the VPC.
- Used AWS CloudWatch CPU/memory alarms to catch 8–10 problems before customers noticed.
- Wrote the deployment runbooks from scratch and rewrote the update SOPs: new-developer onboarding time down 30%, maintenance time down 20%.
- Led monthly post-mortems with the developers, each reviewing 4–6 incidents to find root causes; as a result, added service health checks and a Python cron job on Linux that alerts when a service is down (before, monitoring covered only cost and CPU/memory usage).
- Trained 7 teammates in Docker; the team adopted it for local development as the first step toward container-based deployments.

**Junior Developer Intern** · Apexa Information System, Ahmedabad, India — 01/2020 – 06/2020

- Built and shipped a cross-platform Flutter task manager for about 4 users with a real-time Firebase backend; designed the data model and deployed it on Firebase Hosting.

## Projects

**DISCO** · Software-defined radio team project, RPTU Kaiserslautern `Winter semester 2025/26`

*Course: Project Performance Evaluation in Distributed Systems · Team of 3 · Python, GNU Radio, SDR hardware, Git*

`sci-git.cs.rptu.de/purple-heads/disco-project`

- Studied digital modulation (QPSK, QAM) and how data is packaged into frames for modern radio signals.
- Built the team's QAM64 simulations and sent and received data over the air with SDR hardware.
- Measured over the air with SDR hardware: SNR of 10.21 dB for QAM64 and QPSK, 8.15 dB for BPSK.
- Worked in a shared Git repository with 2 teammates.

**NextGleis** · CI pipeline and serverless API `08/2026 – 10/2026`

*GitHub Actions, Expo, React Native, TypeScript, Node.js, Vercel, EAS*

`github.com/Jaival/NextGleis`

- GitHub Actions pipeline runs type checks, tests and npm audit; Android builds on EAS publish the APK to GitHub Releases.
- Serverless proxy on Vercel turns transport-API XML into JSON and keeps the API keys off the device.

**Kubernetes Lab** · kind (Helm, Prometheus, Grafana planned) `10/2026 – present`

`github.com/Jaival/kubernetes-learning-lab`

- Set up a multi-node kind cluster locally and deployed a sample app to it with kubectl.
- Next modules: Helm charts, Prometheus/Grafana monitoring, and a capstone app deployed by CI.

**Job-Hunt Agent** · Python, Claude Code, MCP `09/2026 – present`

`github.com/Jaival/jobhunt-agent`

- Scheduled agent that pulls job ads from APIs and Gmail alerts, scores them and drafts applications for human review; Python tools keep a job ledger and block drafts that still contain placeholders.

Further projects (web, desktop and mobile apps with CI): Invoicely, NextToBinge, mdgloss, Taskly · github.com/Jaival

## Education

**M.Sc. Computer Science** · RPTU Kaiserslautern, Germany `10/2023 – 09/2027 (expected)`

Focus: Distributed Systems, Network Security · Courses: Network Security; Internet Security Assessment and Operations · Seminar paper (03/2026): “The Gap Between Theory and Reality: A Survey of Deniable Messaging” – surveyed 8 papers on deniable authenticated key exchange (e.g. XZDH) and how deniability holds up in legal and social practice.

**B.Tech Computer Science & Engineering** · Ganpat University, India `08/2017 – 05/2021`

Specialization: Cloud-Based Applications · CGPA 8.67 / 10 (top 10% of class) · Placement Coordinator 2021

## Certifications

- AWS Cloud Quest: Generative AI Practitioner (2025)
- AWS Academy Cloud Foundations
- Google Cloud Platform Fundamentals
- Cisco CCNA: Introduction to Networks (course)
