Jaival Saija

M.Sc. Computer Science Student | DevOps, Cloud & AI: AWS, CI/CD, Docker
saijajaival@gmail.com
Kaiserslautern, Germany
jaivalsaija.vercel.app | github.com/Jaival | linkedin.com/in/jaivalsaija
Nationality: Indian | Student residence permit (§16b AufenthG), eligible for working student jobs (20 h/week)

PROJECTS

Job-Hunt Agent, automated job search with Claude Code

Claude Code, MCP (Gmail, Indeed), Python | github.com/Jaival/jobhunt-agent | 2026

- A daily agent pulls ads from job APIs and Gmail, scores them against my CV and drafts tailored applications for review; Python tools keep a job ledger and block unfinished drafts.

NextGleis, Android departure board for German buses and trains

Expo, React Native, TypeScript, Node.js on Vercel | github.com/Jaival/NextGleis | 2026

- Live departures through a serverless proxy that turns transport-API XML into JSON and keeps the keys off the device; CI runs type checks, tests and npm audit; in development, APK on GitHub.

NextToBinge, one search for movies, dramas and anime

Next.js, Supabase, Drizzle, Clerk | nexttobinge.vercel.app | 2026

- Trending lists and watchlists for every title; CI checks lint, types, tests and the build.

Invoicely, invoicing app for freelancers (in development)

Next.js, Postgres (Neon), Drizzle, Better Auth | invoicely-roan.vercel.app | 2026

- Google sign-in, email verification and organizations; CI runs lint, type checks, tests and Playwright end-to-end tests.

mdgloss, markdown reader for highlighting and commenting (pre-alpha)

Tauri 2, React, TypeScript, Rust | github.com/Jaival/mdgloss | 2026

- Annotations are stored next to the files, which never change; CI checks the frontend and Rust code, and a release workflow builds Windows and macOS binaries.

Kubernetes Lab, hands-on course on a local cluster (learning stage)

kind, Helm, Prometheus, Grafana | github.com/Jaival/kubernetes-learning-lab | 2026

- Multi-node kind cluster running; Helm and Prometheus/Grafana modules in progress, building toward a CI-deployed capstone.

EXPERIENCE

Master's preparation and move to Germany

2022 – 2023

Maven Infosoft Pvt. Ltd., Ahmedabad, India | Junior DevOps Engineer

June 2021 – March 2022

- Automated testing, UAT and dev deployments for 3 products by building their GitHub Actions pipelines.
- Resolved 50+ production incidents in my first six months by tracing server alerts through logs and fixing the networking faults behind most of them.

Skills

Cloud Infrastructure & AWS
- Managed and secured EC2, S3 and VPC across Dev, Stage and Production.
- Wrote least-privilege IAM policies and secure network configurations; AWS guardrails such as Service Control Policies are my next step.

CI/CD & Release Management
- Build and fix GitHub Actions pipelines for tests, builds and deployments, at work and in my own projects. Adding automated security checks (shift-left) next.
- Write runbooks so deployments are boring, predictable and safe on a Friday.

Troubleshooting & Monitoring
- Trace crashes to their root cause through logs, metrics and errors across the stack.
- Set up dashboards and alerts that catch issues before users do.

Security & Networking Fundamentals
- CCNA R&S networking training (IP addressing, subnetting, routing, segmentation), applied to AWS VPC design.
- Explain security trade-offs to developers and agree on a fix instead of blocking releases.

Communication & Teamwork
- Work alongside developers, on site or remote, to understand their code and run it in production.
- Explain infrastructure problems to non-technical people in plain English.

LEADERSHIP & INITIATIVE

- **Placement Coordinator:** Ganpat University (2021). Connected classmates with recruiters and organized campus tech events with companies.
- **Solo DevOps Support:** Usually the first contact for infrastructure issues on my shift at Maven Infosoft.

- Secured Dev, Stage and Production on AWS (EC2, S3, VPC) for a .NET CMS product and its 7-person team by writing least-privilege IAM policies and segmenting the VPC.
- Caught 8–10 CPU and memory problems before customers noticed by setting up AWS CloudWatch alarms.
- Monitored the CMS product's health and uptime by writing Python check scripts and scheduling them as cron jobs on Linux.
- Cut new-developer onboarding time by 30% and maintenance time by 20% by writing the deployment runbooks from scratch and rewriting the update SOPs.
- Prevented repeat crashes by leading monthly root-cause post-mortems with the developers, each covering 4–6 incidents.
- Trained 7 teammates in Docker as the team began moving its deployment pipeline to containers.

Apexa Information System Pvt. Ltd., Ahmedabad, India | Junior Developer (Intern)

January 2020 – June 2020

- Shipped a cross-platform task manager for iOS and Android by building it end to end in Flutter with a Firebase backend that syncs data in real time.
- Designed the app's data model and took it live on Firebase Hosting, fixing the 5–6 bugs and UI issues raised in senior developers' code reviews.
- Later rebuilt it as the open-source app Taskly (github.com/Jaival/taskly-flutter) with Riverpod, offline support, and GitHub Actions CI that tests it and builds releases for 4 platforms.

Ganpat University, Ahmedabad, India | Mobile App Developer (In-house)

May 2019 – June 2019

- Replaced long email chains for booking meetings by building a scheduling app, from the interface to a test phase with professors and my 4-person student team.

EDUCATION

RPTU Kaiserslautern, Kaiserslautern, Germany | M.Sc. Computer Science

2023 – Present

- Focus: Distributed Systems and Network Security.

Ganpat University, Ahmedabad, India | B.Tech CSE (Cloud-Based Applications)

August 2017 – May 2021

- **CGPA: 8.67 / 10.0** (top 10% of class)
- Specialized in cloud applications early: serverless functions and cloud networking.

CERTIFICATIONS

- **AWS Academy Cloud Foundations** and **Google Cloud Platform Fundamentals**
- Cisco **CCNA R&S: Introduction to Networks course** (IP addressing, subnetting, routing).
- **AWS Cloud Quest: Generative AI Practitioner**

Languages

English: Business fluent (C1), used daily at work and university

German: A1, actively learning

Hindi/Gujarati: Native

Technical Proficiency

Cloud: AWS (EC2, S3, IAM, VPC), Google Cloud, Firebase

DevOps: Docker, Git, GitHub Actions, Terraform (basics), Linux administration

Security: IAM least privilege, VPC network segmentation

Code: Python, Bash, JavaScript, Flutter (Dart)

AI: Claude, Claude Code (AI coding assistant)

Data: PostgreSQL, MySQL, Firestore

Learning: Kubernetes, Helm, Prometheus, Grafana
